24/02/22

Students delivered speech on the moral value theme “cleanliness” via intercom.

SPEECH ON CLEANLINESS

This little contribution from our side will make a huge impact in keeping and maintaining our surrounding clean. **For example**, if we don't clean our bedrooms and houses regularly, it will get infested by pests like cockroaches and rats. These pests then come around in our house contaminating the surrounding with its urine and faeces with which we come in contact later and fall sick. These pests spread disease like dysentery, cholera, plague to name a few and that is why we all should help our parents in keeping our homes clean at all times.

Dear friends, it is **NOT ONLY** important to maintain personal and home cleanliness but we all must ensure that we are keeping our environment clean as well. Many times we see that people throw their household rubbish along the roadside, cracks and in the river. This is **NOT RIGHT** and people should **STOP** doing this. It is this rubbish which blocks the drains and when it rains heavily it causes flooding. The recent flooding which we have witnessed few weeks ago was a direct result of **NOT KEEPING OUR SURROUNDINGS CLEAN**.

At this point, I would also like to share my personal observation and I am sure most of you have seen this as well. Our Head of School Mr. Kumar picking up empty snack packets thrown here and there by **US ALL**. He as the **leader** of this school together with all teachers is trying to create an environment to promote cleanliness and good hygiene. So my fellow friends, it is only request to you all, please **STOP** throwing rubbish here and there. Let's join hands with our teachers to keep our environment clean. Please dispose of your rubbish responsibly into the dust bins provided.

Having said that, I must now emphasize on the fact that cleanliness has always been a priority but with the current pandemic, it has become crucial. To be safe from the deadly disease of **COVID-19**, we need to wash and sanitize our hands regularly and keep our surrounding clean at all times.

My dear friends, we can now see how important **CLEANLINESS** is and its significance towards healthy living. So let us all become more responsible and embrace the challenge of keeping ourselves, our surrounding and our environment clean and disease free.

All I want to say is **KEEP CLEAN, STAY SAFE and LIVE A HEALTHY LIFE.**

Wishing you all a wonderful day ahead!!

THANK YOU, DHANYAVAD & VINAKA VAKA LEVU!!!!

By: Ronan Kumar | Year 601 | Nadi Sugam School | 24th February 2022

SPEECH ON CLEANLINESS

The Head of School Mr. Kumar, Dear Teachers and my fellow colleagues, a very **GOOD MORNING** to you all. Hope you all are having a wonderful start to this beautiful day!! I am Ronan Kumar of 601 and I will be speaking to you on this week's theme, **CLEANLINESS**. Before I proceed any further, I would like to thank my class teacher Mr. Chandan for providing me with this opportunity.

So my dear friends, **WHAT IS CLEANLINESS?** It is defined as a state of being clean or keeping your surrounding clean. Cleanliness is an important aspect of healthy living for which personal cleanliness is essential. Personal cleanliness simply means maintaining personal hygiene on daily basis by way of:

- brushing your teeth twice a day;
- taking bath every day;
- keeping your hair neat and tidy;
- ensuring that your finger and toes nails are clean and short at all times; and
- wearing clean clothes.

Your personal cleanliness will avoid growth of germs and bacteria which will help in preventing diseases. **For example**, if you have dirty **short** nails, it will allow bacterial growth and contaminate any food that you will eat. This contaminated food will then make you sick and would possibly give you diarrhea and vomiting. Therefore, it is vital that we maintain personal cleanliness to stay healthy.

Together with this, you must also take care of your surrounding and ensure that it's clean and prevents healthy living. We as kids often depend on our parents to do things for us, but my dear friends, I must tell you that we have the ability to be more responsible and have the potential to help our parents in keeping our homes and surrounding clean at all times.

We as children can simply contribute to this by:

- making our bed daily;
- tidy our bedroom;
- cleaning our cupboards; and
- organizing our study desk.
