Good afternoon colleagues

I wish to convey my hearty thanks to each one of you for the support rendered throughout the week towards IDADAIT awareness program.

Just a humble request to the teachers in charge of taking pictures to forward the pictures to me for report writing.

Thank you once again for the beautiful celebration.

Fat

Fat is an energy source that also serves as a means of storing heat. Fat also has a cushioning effect on the body and is an important component of cell membranes.

Minerals

Minerals are necessary for the structure of body fluids, bones and ligaments. Minerals are also used as cofactors in metabolism and enzymes and are involved in the regulation of body fluids, blood pressure, and the immune system.

Minerals

Minerals are essential for the structure of body fluids, bones and ligaments. Minerals are also used as cofactors in metabolism and enzymes and are involved in the regulation of body fluids, blood pressure, and the immune system.
